EDUCATION

FAST National University of Computer and Emerging Sciences

Bachelor of Science in Computer Science

Islamabad, Pakistan

Aug. 2022 – June 2026

EXPERIENCE

Folio3 Pvt. Ltd.

Data Engineer

Islamabad, Pakistan

May 2026 – Present

- Designed and developed a scalable event-driven ETL pipeline for processing large medical imaging datasets on Microsoft Azure.
- Built serverless workflows using Azure Data Factory, Storage Queues, and Python-based Azure Durable Functions to orchestrate parallel processing tasks.
- Automated dataset validation, sensitive data scrubbing, and standardized image rendering across Azure Blob Storage data lakes.
- Developed resilient and cost-effective cloud solutions by decoupling data processing into modular serverless components.
- Contributed to an in-house AI/ML product for project managers using OpenAI SDK, Gemini APIs, AI Agents, React, PostgreSQL, and SQLite

Trainee Data Engineer

November 2025 - April 2026

- Worked on building ETL pipelines on Microsoft Azure to understand data ingestion and transformation workflows
- Gained hands-on experience with Azure Event Hubs for real-time data streaming concepts.
- Explored Databricks and Apache Spark for learning distributed data processing fundamentals.
- Created Power BI dashboards to visualize datasets and derive meaningful insights.

Codonomy Pvt. Ltd.

Full Stack Developer Intern

Islamabad, Pakistan

June 2025 – August 2025

- Worked with .NET Core and C# in production-level web applications following layered architecture and repository patterns.
- Contributed to backend development, database optimization, and implementation of scalable APIs.
- Developed frontend features for an in-house product *VestureMe*, a virtual try-on platform enabling users to visualize outfits digitally.
- Collaborated with senior developers on real-world projects, improving code efficiency and structure.

Synergy Pvt. Ltd.

Full Stack Developer Intern

Islamabad, Pakistan

June 2024 – August 2024

- Contributed to the development of an in-house chat application used for internal communication.
- Built frontend components using Angular and integrated backend services with .NET Core.
- Followed Agile practices and collaborated with cross-functional teams for timely delivery.

PROJECTS

BuyOneGetOne Platform | *MERN, Tailwind CSS, ShadCN, Origin UI, Aceternity UI* December 2025 – Present

- Built a full-stack platform enabling businesses to publish and manage Buy-One-Get-One deals for free.
- Integrated an analytics dashboard to track clicks, engagement, and sales performance across all campaigns.
- Implemented user-friendly browsing with real-time redirection to official brand websites.
- Developed admin controls for monitoring business registrations and platform activity logs.

AI-Powered HR & Resume Screening System | *React, Node.js, MongoDB, n8n*

October 2025 – Present

- Developed an AI-integrated HR dashboard for automated resume collection, evaluation, and shortlisting.
- Built n8n workflows to extract and score resumes against job descriptions stored in MongoDB.
- Implemented intelligent email listening and candidate matching to streamline HR operations.
- Automated interview scheduling, calendar integration, and talent pool management via Google APIs.

AI YouTube Explainer Workflow | *n8n, Gemini API, Webhooks, React*

July 2025

- Created an AI automation workflow that converts YouTube videos into structured summaries and learning material.
- Integrated Gemini API to generate key insights, FAQs, and topic-based explanations in real time.
- Connected frontend inputs through webhooks for seamless video-to-text analysis and delivery.
- Enhanced research productivity by transforming lengthy videos into concise, actionable notes.

Freelance Job Portal | *MongoDB, Express.js, React, Node.js*

June 2025

- Developed a freelance marketplace with secure authentication, gig creation, and payment integration.
- Designed RESTful APIs for job management, messaging, and transaction processing.
- Optimized React components for performance and implemented a responsive, modern UI design.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, C/C++, SQL (PostgreSQL, MySQL), DAX, HTML/CSS

Frameworks & Libraries: React, Next.js, Angular, Node.js, Express.js, Flask, FastAPI, .NET Core, JUnit, Tailwind CSS

Data Engineering & Cloud: Microsoft Azure, Azure Data Factory, Azure Durable Functions, Azure Event Hubs, Azure Storage Queues, Azure Blob Storage, Databricks, Apache Spark, ETL Pipelines, Distributed Data Processing

AI & Automation: OpenAI SDK, Gemini API, AI Agents, n8n, Make.com, Retell AI, scikit-learn, Pandas, NumPy, PyTorch

Databases: PostgreSQL, MySQL, MongoDB, SQL Server, SQLite, Firebase Realtime Database, Supabase

Tools: Power BI, Git, Postman, VS Code, Cursor, Windsurf, Figma
